Name _____ Age _____ Homeroom/Grade _____

Have you ever built model rockets before? Y N

What is your T-Shirt Size? YS YM YL S M L XL

Do you consent to having your child's photo taken and publish on the club website? Y N

Can your Rocketeer watch October Sky with the club on October 9, 2018? Y N

Rocketeer: This club stresses learning science, math, and technology. You will learn and begin to understand the physics behind rocketry, the math used to compute velocity and altitude, and the technology used in making model rockets. Most importantly, you'll learn that science is fun! **Please don't bring your personal electronic devices** (Nintendo 2/3DS, tablets, iPads, etc.) as there is so much for you to learn and do and you don't need those distractions.

Parents: This club meets once per week on Tuesdays from 4:30 to 5:30. The club sponsors (Officer Buffington and Mr. Christensen) will do our very best to have your children outside and ready for your prompt pick-up at 5:30. On our launch days you are more than welcome to come participate with your child as they, and the other club members, launch their rockets. My goal for this club is to teach your child that science is fun, but also how to read and follow directions and how to pay attention to detail.

We will meet in the Robotics/Rocketry Club room 1.067 (6th grade floor)

We anticipate launching rocket #1 on September 25, 2018 and Rocket #2 on November 27, 2018

Stay up to date with the club by visiting our website at www.bulldogrocketry.com!

We understand the expectations of the Rocketry Club.
